Jungle Gym®

Kids

Children discover the world through play. They run, climb, crawl, laugh; they go in, out, up, down, across, behind and in between... They not only enjoy every second of it, play supports their development as well. With a Jungle Gym play set, you can let them play and explore in the safe and familiar environment of your own home. A Jungle Gym play set stimulates a child's imagination, creativity, movement, coordination and strength.

Since 1995, Jungle Gym has designed domestic wooden playground equipment and is known for its safety, durability and eye for detail. Our team of qualified designers works with a strict safety-first policy. Combined with our imagination, knowledge and experience, Jungle Gym has created this unique collection of play sets that meets every child's needs.

Safe

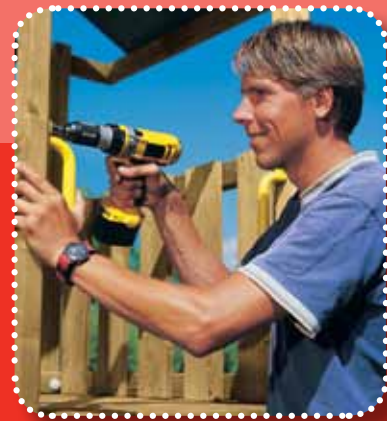

Safety is the key factor in all our designs. They correspond to the safety guidelines for domestic and family use (EN 71-1, -2, -3, -8 & -9). The play sets contain many safety components such as slip-resistant rungs, handgrips, bolt protection caps, ground anchors and a Bumper Pad™. With these, you can create an exceptionally safe play area for your child.

Simple

Do-it-yourself kits from Jungle Gym make it very easy to put together your own play set. They all come with clear step-by-step instructions and an extended set with all of the assembly materials you need: hardware, connection brackets and drill bits.

EN 71-1,-2,-3,-8 & -9

Fun

With Jungle Gym, you put together a play set that brings outdoor fun for many years. All our play sets are expandable and can be customized with the addition of a wide variety of modules and accessories. There are towers for every taste, available area and budget. You can always decide to expand later so the play set can grow as your child grows. The towers come with fun extras such as a Jungle Flag™, Jungle Gym ID™ and Jungling Cards™ to invite friends. Also, lots of towers already include fun accessories, for example, the Steering Wheel™, Talking Tube™, Climbing Rope™, PicNic-table, Fun Phone™ and StarOscope™.

Complete

A Jungle Gym play set contains:

Clear step-by-step instructions

An extended set with all the assembly materials, hardware and connection brackets

All needed drill bits

Handgrips

Metal ladder rungs and rung end covers

Jungle Gym ID™

3D Level™

Sandpad

The Ground Anchors™ are used to anchor the playground equipment sturdily in the ground, so that it cannot tilt or shift

Bumper Pad™

Palace™

Incl.

- 1 Step Ladder™
- Climbing Rocks™
- PeekOscope™

401_005 – The biggest climbing frame in our range with two levels! A sandpit or PicNic-table is an option.
For an extension to this tower, see page 25.

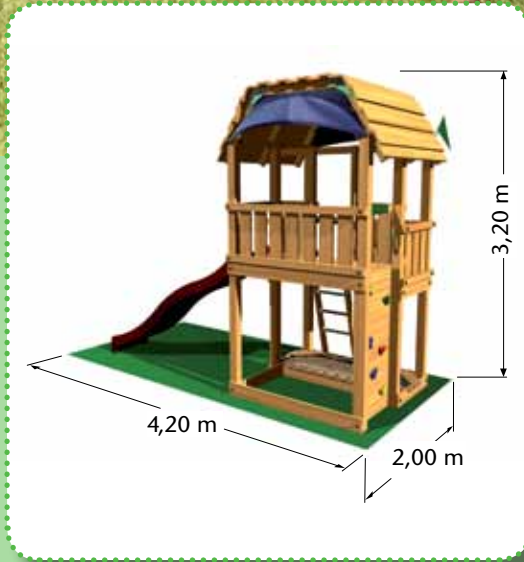

Barn™

- Incl.**
- Climbing Rocks™
 - Steering Wheel™

401_007 – A tough climbing tower with two levels of height and a unique roof design. The sandpit and challenging Rock Wall make the Barn™ a perfect choice for children of various ages. As always, the tower contains many safety components and can be extended endlessly with all the Jungle Gym Modules and accessories. For an extension to this tower, see page 25.

3,00 m

Farm™

- Incl.**
- Climbing Rocks™
 - PeekOscope™

401_008 – A robust climbing unit on two levels with domed tent roof. It has two entries to the platform with the possibility to attach two slides, one on each level. Under the platform there is an option to build a veranda, and there's still space for a sandpit. For an extension to this tower, see page 25.

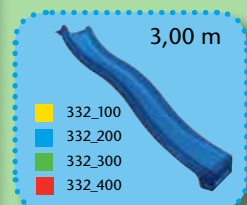

Mansion™

Incl.

- Climbing Rocks™
- Bucket Module™
- Steering Wheel™

401_009 – An impressive play set with a wooden roof and two platforms. This creates the possibility of a sandpit and a PicNic-table at the same time. Attached to the extra platform there is a Climbing Wall so you can choose to go up and down by ladder or via the Rocks. For an extension to this tower, see page 25.

Fort™

- Incl.**
- 1 Step Ladder™
 - Climbing Rocks™
 - StarOscope™

401_010 – A very complete, robust tower with a lot of fun facilities and an option to make a PicNic-table under the tower. For an extension to this tower, see page 25.

3,00 m

- 332_100
- 332_200
- 332_300

Chalet™

- Incl.**
- Bucket Module™
 - Fun Phone™
 - Steering Wheel™

401_013 – Large tower with a sturdy wooden roof and a balcony. Under the platform there is room for a sandpit or there is an option to make a PicNic-table. Hardware for the PicNic-table is included.

For an extension to this tower, see page 25.

Barrack™

- Incl.**
- Steering Wheel™
 - Talking Tube™

401_016 – A tough tower with a large platform, great balcony and lots of fun accessories already included. The dome-shaped roof suits even larger children and underneath the platform you can make either a sandpit or a PicNic-table.
For an extension to this tower, see page 25.

Villa™

Incl.

- Climbing Rocks™
- 1 Step Ladder™
- Climbing Rope™

401_020 – A spacious tower with domed tent roof, which gives taller children plenty of standing room. There is space for a sandpit under the platform.
For an extension to this tower, see page 25.

Lodge™

Incl.

- 1 Step Ladder™
- StarOscope™
- Steering Wheel™

401_040 – A large tower that comes with loads of built-in fun which offers your children years of garden fun. There is room for a sandpit under the platform. For an extension to this tower, see page 25.

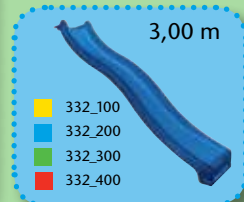

Cabin™

Incl.
• StarOscope™

401_060 – A high tower with a sturdy wooden roof and climbing ladders located both at the front and back. The telescope supplied transforms the Cabin™ into a true watchtower. For an extension to this tower, see page 25.

Shelter™

401_065 – A classic climbing tower. Suitable for any garden, because of its simplicity and compact size. An innovative, layered structure for the wooden roof is used. A sandpit can be created underneath the tower for more fun. As always, the tower contains many safety components and can be attached with most of the Jungle Gym Modules and accessories. For an extension to this tower, see page 25.

Cubby™

- Incl.**
- Steering Wheel™
 - Climbing Rocks™

401_070 – An adventurous and daring tower with two floors and a Climbing Wall instead of a ladder to combine challenge with fun. You can make a sandpit underneath if you like. For an extension to this tower, see page 25.

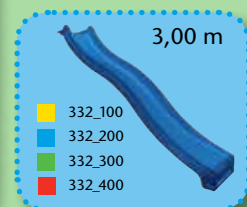

Yellow	332_100
Blue	332_200
Green	332_300
Red	332_400

Cottage™

401_090 – A solid, basic play set with a wooden roof. You can make a sandpit underneath if you like. For an extension to this tower, see page 25.

Hut™

401_100 – A compact tower with a platform height of 1,25 m.

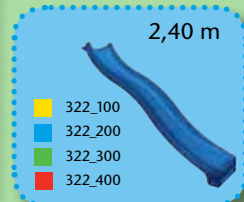

For an extension to this tower, see page 25.

Club™

401_110 – A highly compact tower with a wooden roof, suitable for smaller gardens with a sandpit under the platform. The ladder is at the side.
For an extension to this tower, see page 25.

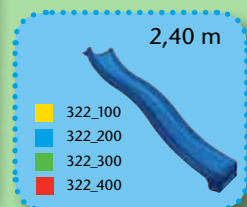

Castle™

401_120 – Suitable for smaller gardens. It takes up minimum space with the possibility to position the Castle™ in a corner. The ladder is at the side.

For an extension to this tower, see page 25.

Tower™

401_200 – A real watchtower for smaller gardens. There is room for a sandpit under the platform.
For an extension to this tower, see page 25.

450_245 – Transform your Jungle Gym tower into a two story play house with window and door. The Play House Module™ can be assembled on every Jungle Gym tower (except on the Barrack™).

Rock Module™

450_200 – Children love climbing. With the rocks you can make a challenging climbing wall on which your children can climb into their tower. This module can be attached to all the climbing towers.

1 Step Module™

450_300 – For even more climbing fun, you can extend your tower with a rope ladder or a 1-step ladder. Ideal for the older children. This module can be attached to all the climbing towers.

Tic Tac Toe Module™

450_310 – An extension to your tower with a game. This module can be attached to all the climbing towers.

.....Bucket Module™

450_320 – A safe and a fun way to hoist a bucket with sand and toys to the platform and down again. This module can be attached to all the climbing towers.

.....Talking Tube™

450_330 – Flexible and playful communication system for exciting conversations between platform and base, in flower design. This module can be attached to all the climbing towers.

CERT.NO.S60017385

TIMBER

The durability of your play set depends for a great deal on the timber you choose. We recommend pinewood, either naturally resistant to wood-rot and insect damage or pressure treated.

TIMBER MEASUREMENTS

The quantity of the timber depends on the available widths and lengths at your retailer.

Due to the content of the hardware package you have the possibility to use timber dimensions to suit your wishes/requirements for building a sturdy climbing frame. To build a safe play set the measurements should be within the margins given.

QUALITY OF TIMBER

Make sure to check your timber for the absence of large knots. We also recommend buying on four sides sanded and planed beams and boards.

COMMERCIAL PLAYGROUNDS

PROJECTS

Hy-land provides a large range of Projects to turn your available space into a unique and challenging playground. Hy-land's biggest Project can accommodate up to 12 children at a time. Any Hy-land Project is robust and durable. Smartly designed and easily installed due to its modular character: all designs are based on two basic frames.

QUALITY

The heavy-duty Hy-land components and hardware meet the highest standards and are regularly tested for strength and durability. They are weather resistant and galvanised coated. Hy-land playgrounds are easily installed and require low maintenance.

VALUE

Hy-land is the effective way to create a high quality playground suitable for a commercial application that fits any budget. Hy-land is a truly affordable choice.

HY-LAND PROJECTS FIT ANY LOCATION, PLAYGROUND AREA AND BUDGET!

CONTENT

- Owner manual
- Logbook template
- Polyamide bolt covers
- Rough-coated steel handgrips
- Climbing rocks
- Steel roof mounting brackets
- Non-slip coated ladder rungs
- Multi-purpose brackets
- Triple-coated hardware
- Dedicated tools
- Sandbox ground and top cover
- 3D leveller tool
- Aluminium ID-plate
- Drilling and spacing tool
- Hy-Slide™ mounting hardware

HY-SLIDE™

Each Project comes with a Hy-Slide™. Its mounting hardware secures this heavy-duty slide to both the 1,50 m high platform and the construction site. The use of UV-resistant HDPE structural foam enables the Hy-Slide™ to withstand the rigorous use on commercial playgrounds.

SAFETY

Hy-land playgrounds are carefully engineered to ensure optimum safety. All are type-approved by TÜV Rheinland, Germany according to European Standard EN 1176 for use on public playgrounds. To administer the required periodical inspection and maintenance services, a logbook template is provided.

SURFACE

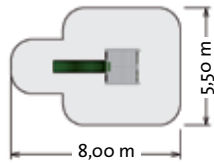

All play equipment must be installed over a shock-absorbing playground area surface according to European Standard EN 1177. For extra safe and secure anchoring of your entire Hy-land to a non-paved construction site, additional Anchor Sets are available. These are specially designed to stabilise your Hy-land playground easily.

PROJECT 1

User age	3-12 year
Users	4 children
Assembly time	ca 4h by 2 pers
Dimension	4,00 x 1,50 x 2,30 m
Platform height	1,50 m
